Abstract

PURPOSE:To improve heat insulation property and sound absorbing property of the aimed building material and lighten the weight thereof by blending granular small pieces obtained by breaking a rockwool formed body with a binding agent and forming the blend.

CONSTITUTION:A rockwool 1 and binding agent 2 are formed to provide a rockwool formed article 3. The rockwool formed article 3 is broken to prepare rockwool granular small pieces 4. Then these rockwool granular small pieces 4 are blended with a binder 2 to produce the rockwool building material A.
